Final-year Software Engineering student at IPNET Institute of Technology (graduating 2026) with a mathematics background and three internships spanning backend development, AI integration and financial data analysis. Builds REST APIs with FastAPI and Node.js, integrates ML and NLP models into web and mobile products, and analyzes data with Python and SQL. Four national and inter-school tech awards; focused on data protection and responsible technology in Africa.

SKILLS

Programming

Python, Java, TypeScript, JavaScript (ES6+), SQL, Dart

Backend & APIs

FastAPI, Node.js (Express), Django, Spring Boot, REST APIs, Swagger / OpenAPI

Data & AI

Machine Learning, Deep Learning, TensorFlow / Keras, NLP (CamemBERT), audio processing (MFCC), LangChain, Ollama, data analysis (Excel)

Databases

PostgreSQL, MySQL, SQLite, database modeling

Frontend & Mobile

React, Angular, Tailwind CSS, Flutter

DevOps & Tools

Git / GitHub, Docker, Render, Postman

Engineering practices

OOP, MVC, Clean Architecture, UML, unit testing, technical documentation

EXPERIENCE

01

Data Analysis Intern

Mixx By Yas, Lomé, Togo · 2026 – Present

- Analyzed and reconciled financial data on the partner accounts of a mobile payment operator.
- Cleaned and validated financial files of 1,000+ rows, removing duplicates, fixing dates and bringing reconciliation gaps down to zero.
- Performed periodic three-source reconciliations and automated recurring PostgreSQL queries with Python.

02

Software Development Intern

THESYMO, Lomé, Togo · Aug 2025 – Oct 2025

- Designed a content analysis and recommendation API with FastAPI (Python).
- Integrated an intelligent chatbot into the product using LangChain and Ollama.

03

Software Development Intern

Thot Lab, Lomé, Togo · Jul 2024 – Sep 2024

- Built REST APIs in Node.js integrated with a PostgreSQL database, as part of the engineering team.
- Improved code performance by 30% through refactoring and unit testing.
- Wrote the API technical documentation with Swagger.

PROJECTS

CardioBeat · Final-year project

[Live demo ↗](#)

- Built an AI-assisted prototype that classifies heart sounds as Normal or Abnormal, designed as a decision-support tool rather than a diagnostic device.
- Trained a deep learning model reaching 87.7% accuracy and 89.2% sensitivity; delivered a FastAPI service, a Flutter demo app and a UML analysis document.

EDUCATION

IPNET Institute of Technology

Licence Professionnelle in

Software Engineering

Lomé, Togo · 2023 – 2026

Third year, expected graduation

2026. Final-year project and thesis:

CardioBeat.

Collège Protestant Lomé

Agbalepedogan

Baccalauréat, Series D (Science & Mathematics)

Lomé, Togo · 2023

Highest honors (Mention Très Bien)

LANGUAGES

French · Fluent

Mina · Fluent

English · Intermediate, improving

LEADERSHIP

Vice President

IPNET Developer Club

- Co-led the student developer community and coordinated its technical activities.
- Supported peer learning and drove collaborative projects.

Student engagement

- Academic competitions and debates.
- Popularized scientific and technical topics among fellow students.

PROJECTS (continued)

IVAN · Multi-platform AI chatbot

- Developed an NLP chatbot with a React front end and a FastAPI back end using CamemBERT; containerized with Docker and deployed on Render.
- Awarded 2nd prize for most innovative project at IPNET Open Days (JPOPE 2024).

React

FastAPI

CamemBERT

Docker

Render

PharmApp · Pharmacy management web app, 2025

[GitHub ↗](#)

- Built a web application automating pharmacy stock tracking, with sales and customer management, financial reports and analytics.

Django

PostgreSQL

JABARIE · Afro-futuristic 3D game, team of two

- Wrote the game design document, script and pitch; managed a backlog of about 150 tasks; prepared the business plan, poster and jury pitch. 3rd prize, JPOPE 2026.

Unity

C#

AWARDS

1st

1st Prize — Génie Tech 2025

Inter-school science & tech contest · IPNET Institute of Technology team

Won the final against ESAG-NDE; contest organized by IDS Technologie for its 30th anniversary.

2nd

2nd Prize, Most Innovative Project — JPOPE 2024

IVAN · AI chatbot

Awarded at IPNET Open Days.

3rd

3rd Prize — ANAC Togo Symposium 2025

DEDIE · Aviation safety app · Team Vortex Aura

App to report and manage aviation security incidents, built with an all-women team during a national hackathon organized by Togo's Civil Aviation Authority.

3rd

3rd Prize — JPOPE 2026

JABARIE · 3D video game

WRITING

Quand les données personnelles deviennent des armes

Medium · Dec 2025 · In French

How personal data collected by digital platforms enables online harassment, blackmail and identity theft against young women in Africa, with a focus on Togo.
